

TOTAL FILTRATION SERVICE FOR COMPRESSED AIR

Everything from one single Source

Total Filtration Service for Compressed Air

About Donaldson

Donaldson is a leading worldwide provider of filtration systems. Since 1915, our innovative technologies improve people's lives, enhance equipment per-

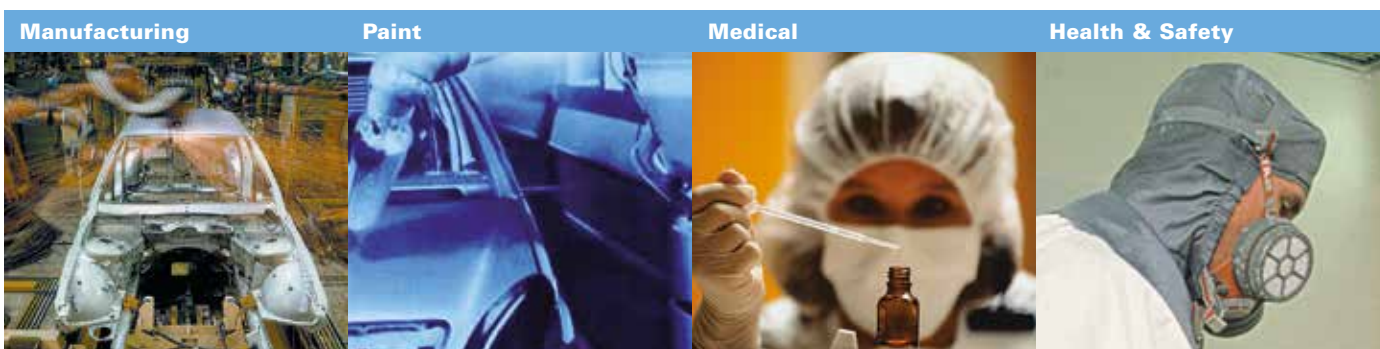

formance and help to protect the environment. We are a technology-driven company that promises no less than the best solutions for high quality compressed air purification, sterile air and steam filtration. Our products are engineered to improve efficiency and extend filter life time. A maximum of energy savings and a high product quality are guaranteed.

Service and Consulting

Choose Donaldson as your partner for a wide variety of service solutions. Donaldson products enhance operational safety and increase product quality and energy savings for all types of compressed air and breathing air systems. With an all-embraced service concept, a close support network throughout Europe, qualified service engineers and individual service offerings we are your perfect partner throughout the entire product life cycle of your compressed air system – for our own high quality brand Donaldson Ultrafilter® and for most other popular brands.

We are always nearby

Thanks to Donaldson's broad service network, you receive quick and cost-effective competent services for all filtration applications from one source. Rely on our qualified service engineers to help you optimise your compressed air systems. Please find our locations on www.donaldson.com. We are at your service and in your neighbourhood.

First Class Service

Total Filtration Management

With the growing need to reduce complexity, consolidate sources of supply, simplify processes, reduce administration costs and working capital, Donaldson has developed Total Filtration Management. As an original equipment manufacturer and filter media supplier, Donaldson provides you with advanced filter replacements from one source irrespective of the type or make you require. Total Filtration Service provides incomparable value to your production line and your bottom line. Europe's source for competent and first class technical service and support, Donaldson helps you keep your production systems running at their best.

Our Service Offering – your Advantage

- Total customer care commitment
- First class service for compressed air purification
- Leading filtration expertise
- Local presence

Donaldson's Service offers a range of services to help you determine current production efficiencies, identify areas for improvement and tailor a service program to your precise compressed air, sterile air and steam filtration needs. The service also offers a full assessment of the status of your production

systems. We measure and analyse current efficiency and determine areas for potential future cost savings.

Inspection and Maintenance

Donaldson provides services for all components of your compressed air system – the best selection of individual services or full service. Agreements comprising of different maintenance offerings tailored to fit your needs and requirements.

The Ultra-Filter Housing is easy to open in order to change the Filter Element

Qualified Technical Service

Air Survey

Comprising of a full visual assessment of the status of your production and purification systems and evaluation of the current efficiency, the air survey determines areas for potential future cost savings as well as improvements.

Air Audit

To determine and numerically define the exact annual cost saving potential, it is necessary to conduct an Air Audit.

Air Quality Audit

Donaldson's measurement technologies reliably determine your compressed air quality. Compressed air, dew point and residual oil are analysed. The air quality audit detects and precisely determines the oxygen, CO₂ and CO levels for special applications such as used for breathing air.

Preventative Maintenance avoids Emergency Calls

Commissioning

To ensure the perfect match between on-site operating conditions and system settings, professional commissioning is a must. Only if on-site operating conditions and system settings are perfectly matched your system will deliver the best performance and reliability at lowest operating costs.

Laboratory Service

To enhance and complement our field services, highly sophisticated in-house laboratory services with highly sophisticated laboratory services are provided to validate oil aerosols, oil mist, particle size or concentrations.

Donaldson offers a wide Range of Services

Clean and easy Exchange of the Cartridges

Leading Filtration Experts

Tailor-made Service Agreements

Donaldson has a full menu of service programs to meet your precise needs. By choosing from our service offerings, you select only the services and maintenance schemes you need to create the most effective and economical program for your operation.

All service agreements can be upgraded with individual service, such as visit intervals or a diagnostic check each month. We fulfil the right service level you require. All services include full documentation, check lists, analysis reports and operator recommendations. Always providing the right level of service.

Partner in Savings and Productivity

Our service is always nearby. With the largest and most accessible technical service and support network throughout Europe, we can routinely service your production systems as well as provide on-site

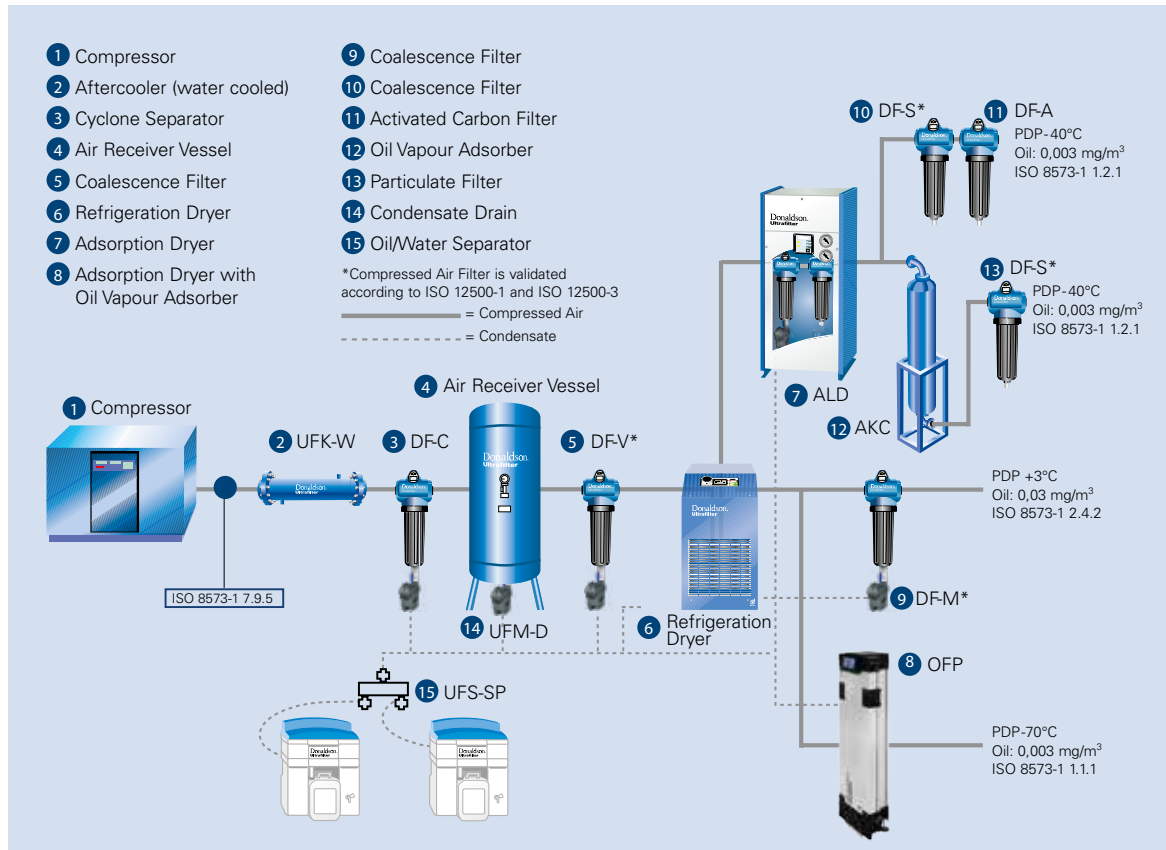

support whenever needed. With one of Donaldson's service centers on average no further than 200 kms from your operation, you receive quick and cost-effective competent services for all filtration applications from one source. Rely on the Donaldson service technicians to help you keep your production systems on course. We're at your service and in your neighbourhood – 24 hours daily.

With the correct Selection of the Filtration Level and Flow Rate for individual Applications, the right Product is always available
